Energy performance certificate (EPC)				
Flat 4 38 Redcliffe Square LONDON SW10 9JY	Energy rating	Valid until: 6 April 2032 Certificate number: 0380-2823-6140-2202-4551		
Property type		Mid-floor flat		
Total floor area		67 square metres		

Rules on letting this property

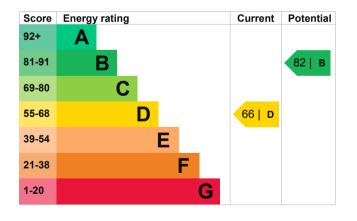

Properties can be rented if they have an energy rating from A to E.

If the property is rated F or G, it cannot be let, unless an exemption has been registered. You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy efficiency rating for this property

This property's current energy rating is D. It has the potential to be B.

<u>See how to improve this property's energy</u> performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Window	Single glazed	Very poor
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Average
Lighting	Low energy lighting in 41% of fixed outlets	Average
Roof	(another dwelling above)	N/A
Floor	(another dwelling below)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 226 kilowatt hours per square metre (kWh/m2).

Environmental impa property	act of this	This property produces	2.7 tonnes of CO2
This property's current environmental impact rating is D. It has the potential to be B.		This property's potential production	1.2 tonnes of CO2
Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.		By making the <u>recommended changes</u> , you could reduce this property's CO2 emissions by 1.5 tonnes per year. This will help to protect the environment.	
Properties with an A rating	produce less CO2		
than G rated properties. An average household produces	6 tonnes of CO2	Environmental impact ratin assumptions about average energy use. They may not consumed by the people liv	e occupancy and reflect how energy is

How to improve this property's energy performance

Making any of the recommended changes will improve this property's energy efficiency.

If you make all of the recommended changes, this will improve the property's energy rating and score from D (66) to B (82).

Recommendation	Typical installation cost	Typical yearly saving
1. Internal or external wall insulation	£4,000 - £14,000	£122
2. Add additional 80 mm jacket to hot water cylinder	£15 - £30	£10
3. Low energy lighting	£50	£32
4. Condensing boiler	£2,200 - £3,000	£70
5. Replace single glazed windows with low-E double glazed windows	£3,300 - £6,500	£42

Paying for energy improvements

Find energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

Estimated energy use and potential savings		(https://www.simpleener	<u>gyadvice.org.uk/)</u> .
		Heating use in this	s property
Estimated yearly energy cost for this property	£615	Heating a property usually makes up the majority of energy costs.	
Potential saving	£274	Estimated energy used to heat this property	
		Space heating	4535 kWh per year
The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.		Water heating	2695 kWh per year
The estimated saving is based on making all of the recommendations in <u>how to improve this</u> property's energy performance.		Potential energy savings by installing insulation	
<u>proporty o onorgy ponormanoo</u> .		Type of insulation	Amount of energy saved
For advice on how to reduce your energy visit Simple Energy Advice	/ bills	Solid wall insulation	2377 kWh per year

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
